## STLCC Libraries: Newsletter

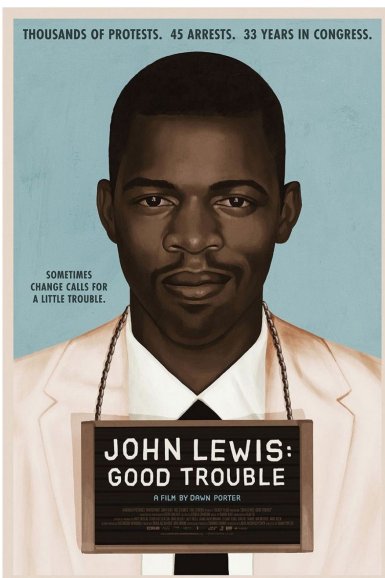

Dr. Michael Fuller

The STLCC Libraries launched a monthly Speaker Series in October (a reimagined version of the lecture series held at the Florissant Valley campus for many years). Dr. Howard Rosenthal gave the inaugural talk, *7 Carefully Guarded Secrets to Help You Publish Your Non-Fiction Book*. Upcoming talks include: *Warriors, Wise Women and Spirit Beings in Missouri's Indigenous Rock Art* with Dr. Michael Fuller. [Register here](#) and *Hot Books for Cold Nights: Great Books to Read over Winter Break* with recommendations from five faculty librarians. [Register here](#)

The Spring 2021 calendar includes such diverse topics as the struggle to raise the minimum wage, LGBTQ and the Black experience in St. Louis, Black women and beauty culture, the Chinese Cultural Revolution; and growing up in an Arab-Jewish household. All events are free, online and open to the public. [Register here](#)

## RACIAL JUSTICE FILM SERIES

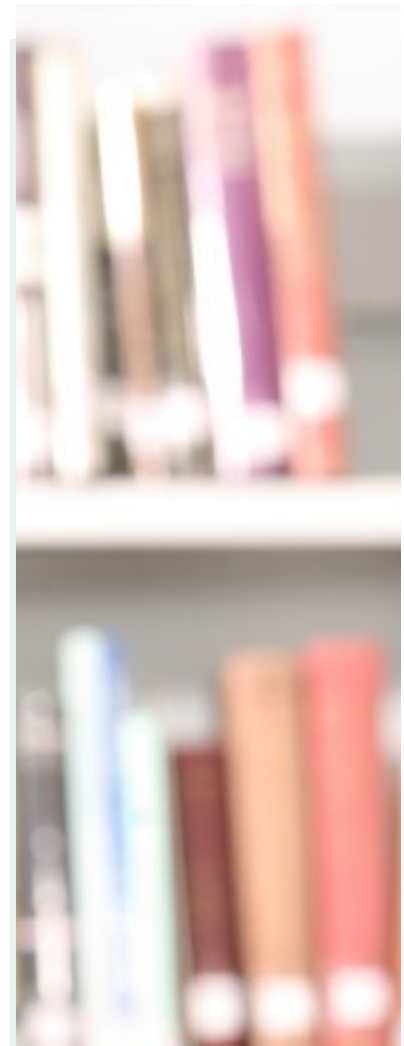

Over the summer, the libraries partnered with Campus Life and launched the Racial Justice Film Series. Like a book club, everyone watches the movies on their own time and then joins in for moderated discussions.

Fall discussions have included *Just Mercy*, *The Pruitt-Igoe Myth*, *I Am Not Your Negro*, *13th*, *The Hate U Give* and *Good Trouble*.

The Spring 2021 calendar will commence with a discussion of *Selma* on January 27, 2020, at 11 a.m.

Please check out our LibGuide <https://guides.stlcc.edu/racial-justice-film> to see our schedule of upcoming discussions and supplemental material related to the films we have discussed. Registration for each event is included.

## LIB 101 is Back

STLCC Libraries are now offering the one-credit online course **LIB 101: Introduction to Library and Online Research** during the first eight weeks of the Spring 2021 semester.

This course will help students sift through oceans of misinformation and questionable sources. They will learn how to find and identify high-quality websites, books, and articles for research papers, projects, and lifelong learning. Recommended for students who are new to the research process as well as those who want to upgrade their research skills for the information age. This course is also ideal for students concurrently enrolled in another course that requires an in-depth research project.

See [attached flyer](#) or contact Janice Hovis, Instruction Librarian ([jhovis@stlcc.edu](mailto:jhovis@stlcc.edu)) for more information.
