Selective Admissions to Nursing Program Prerequisites (Rationale for Selective Admissions to Health Professions Programs)

Students who wish to declare a major in some health professions programs must meet minimum criteria in order to apply. Admission to the nursing programs is selective due to availability and limitations of practicum sites and limitations in the number of students who can be accommodated in clinical groups. All students interested in this program should consult a Nursing Advisor on the campus of their choice.

The Nursing Program requires clinical or field experience as part of the curriculum. A criminal background check, drug screen, and documentation of current immunizations are required (at the student's expense) for participation in clinical or other field experiences. Specific criteria for admission are on the reverse side of this document. For further information visit our website at <https://www.stlcc.edu/programs-academics/pathways/health-sciences/nursing/index.aspx>.
